The screenshot shows the Mendeley Desktop application window with the 'File' menu open. The menu items are: Add Files... (Ctrl+O), Add Folder... (Ctrl+Shift+O), Watch Folder..., Add Entry Manually..., Import..., Export... (Ctrl+E), Merge Documents, Export PDF(s) with Annotations..., Delete Documents, Remove from Folder, Rename Document Files..., and Synchronize Library (F5). The 'Import...' option is selected, and its submenu is visible, showing: BibTeX (*.bib), EndNote XML - EndNote v8, X1 to X3 (*.xml), and RIS - Research Information Systems (*.ris). Annotations include red boxes around 'Add Files...', 'Add Folder...', 'Watch Folder...', 'Add Entry Manually...', and the 'Import...' submenu. Arrows point from the Russian text on the left to these menu items. Below the screenshot, the text 'Импорт ссылок в форматах:' is followed by three arrows pointing to the logos for BibTeX, RIS (with a Scite4x logo), and EndNote.

ABSTRACT.

In this paper, the author summarizes the main problems that have to be solved by regional commercial banks and, in particular, banks in the Far North and equivalent territories in the current political situation and conditions of economic sanctions. The country's banking system is not adequate to the needs of the national economy and is unable to provide resources for the country's modernization. The ability of banks to finance the needs of the real sector is significantly constrained by the lack of long-term and cheap financial resources from the banks themselves.

Stock market prediction system with modular neural networks
T Kimoto, K Asakawa, M Yoda... - ... IJCNN international joint ..., 1999
A discussion is presented of a buying-and selling-time prediction system for the Tokyo Stock Exchange and the analysis of internal representation. The authors developed a number of learning algorithms for modular neural networks. The authors developed a number of learning algorithms for modular neural networks. The authors developed a number of learning algorithms for modular neural networks.

Stock market prediction with multiple classifiers
B Qian, K Rasheed - Applied Intelligence, 2007 - Springer
Stock market prediction is attractive and challenging. According to the random walk hypothesis, stock prices should follow a random walk pattern and thus are unpredictable with more than about 50 percent accuracy. In this paper, we propose a new prediction method based on multiple classifiers.

Textual analysis of stock market prediction using breaking financial news: The AZFin text system
RP Schumaker, H Chen - ACM Transactions on Information Systems, 2006
Our research examines a predictive machine learning approach for financial time series analysis using several different textual representations: bag of words, named entities. Through this approach, we investigated 9,211 financial news articles from the Wall Street Journal.

Stock market prediction of S&P 500 via combination of BP neural network and genetic algorithm
Y Zhang, L Wu - Expert systems with applications, 2009 - Elsevier
The paper proposed an improved bacterial chemotaxis optimization (IBCTO) algorithm integrated into the back propagation (BP) artificial neural network to develop a forecasting model for prediction of various stock indices. Experiment results show that the proposed model outperforms other models.

The screenshot displays the Mendeley Desktop application window. The menu bar includes File, Edit, View, Go, Tools, and Help. The toolbar contains icons for Select, Pan, Note, Highlight, Color, Zoom, Zoom To Fit, Fullscreen, Sync, and Help. A search bar on the right contains the text 'banking'. Below the toolbar, a window titled 'Showing match 1 of 21' displays search results. The main text area shows a snippet from a document: 'Trends in the development of the banking system in the Far North of the Russian Federation'. Annotations are applied to this text: a purple highlight box around 'development', a yellow highlight box around 'banking', and a purple note box with the text 'Заметка внутри статьи' (Note inside the article) pointing to the word 'system'.

Trends in the development of the banking system in the Far North of the Russian Federation
